

Geography Worldwide Quiz report, 15th March 2018

On 15th March, 2018, St. Anthony's School took a team of four boys to Westminster School for the Worldwide Geography Quiz. It was a fun and informative evening.

This Competition is a unique program that has been prepared especially for future young geographers, and has two goals:

- a. to promote international awareness for students through social contacts and interaction;
- b. to contribute to the study of Geography in Schools

The four boys pitted their geographical wits against other schools and made a tremendous start, scoring full marks in the Development round. They showed superb Geographical knowledge and worked extremely hard as a team throughout.

Many of the questions, skills and knowledge were tailored towards the new Geography C.E. curriculum and exam, so the competition was a useful opportunity for them to put their geographical talents to the test.

Team photograph; the boys were proud of their achievements

I would like to thank Adam for accompanying the team on this trip and supporting the boys throughout the competition.
